Italy

IT **FatturaPA integration**

The regime

In the clearance model the invoice goes to the tax authority first, is approved, then reaches the buyer.

Italy runs the clearance route through its own exchange system for domestic business invoices.

In Italy domestic B2B invoices have been issued only electronically, through the Sistema di Interscambio (SdI), since 1 January 2019, and an invoice sent any other way counts as not issued. TecT converts the SAP document into the FatturaPA format and delivers it to SdI.

The European Union's "VAT in the Digital Age" (ViDA) package cleared the way for member states to impose their own e-invoicing mandates and set a common digital reporting timeline for cross-border transactions.

What it means in day-to-day operation

- An invoice sent outside the exchange system does not count as issued.
- Delivery receipts and rejections drive what happens next, so they belong on the document.
- Inbound invoices arrive through the same system rather than by mail.

On the SAP side

No more native ABAP add-ons that slow the system and complicate upgrades. TecT runs outside your SAP system, keeps your core clean and talks to every release from SAP R/3 to SAP Public Cloud.

The document is produced in SAP, country rules are applied in the integration layer, and the result is written back to SAP.

SAP Public Cloud Future · fully isolated cloud architecture

SAP S/4HANA Modern · high-performance, agile

SAP R/3 Legacy · stable and secure data extraction
