Oman

OM **OTA e-invoicing**

The regime

In the decentralized model the document standard and network are mandatory while the authority observes.

Oman builds on a five-corner model in which accredited providers also report the tax data.

In Oman e-invoicing runs through the tax authority's Fawtara programme: documents are exchanged through accredited service providers, which also report the tax data to the authority. TecT connects the invoice created in SAP to that route.

What it means in day-to-day operation

- The provider is part of the setup: format and route are chosen together.
- Reporting to the authority rides on the same flow as the invoice itself.
- Inbound documents come from the network, so receiving is in scope from day one.

On the SAP side

No more native ABAP add-ons that slow the system and complicate upgrades. TecT runs outside your SAP system, keeps your core clean and talks to every release from SAP R/3 to SAP Public Cloud.

The document is produced in SAP, country rules are applied in the integration layer, and the result is written back to SAP.

SAP Public Cloud Future · fully isolated cloud architecture

SAP S/4HANA Modern · high-performance, agile

SAP R/3 Legacy · stable and secure data extraction

What TecT covers

- e-Invoice, e-Archive, e-Waybill and e-Ledger in one hub
- Rule-based automation with AI-assisted matching suggestions
- Bank statements (EHÖ) and Online Direct Debit (DBS) inside SAP
- Mobile cockpit and AI assistant with TecT App

TecT Standart	Core e-transformation hub	e-Invoice · e-Archive · e-Waybill · e-Ledger
TecT Plus	Financial excellence and automation	Bank statements (EHÖ) · 21 banks · Online Direct Debit (DBS) · 20 banks · Bulk payments · F110 · e-Reconciliation
TecT App	Mobile cockpit and AI assistant	Cockpit · Assistant · Cash and bank tracking · Document flows
