Poland

PL **KSeF national e-invoicing system**

The regime

In the clearance model the invoice goes to the tax authority first, is approved, then reaches the buyer.

Poland runs the clearance route through its own central platform, KSeF.

In Poland invoices are issued through the central KSeF platform; the obligation to receive invoices from KSeF began on 1 February 2026 and the obligation to issue was phased in by turnover threshold. TecT sends the document from SAP to KSeF and writes the KSeF number back.

The European Union's "VAT in the Digital Age" (ViDA) package cleared the way for member states to impose their own e-invoicing mandates and set a common digital reporting timeline for cross-border transactions.

What it means in day-to-day operation

- Every invoice passes through the central platform before it reaches the buyer.
- The number returned by the platform belongs on the document in SAP, not in a side list.
- Incoming documents are collected from the platform rather than from a mailbox.

On the SAP side

No more native ABAP add-ons that slow the system and complicate upgrades. TecT runs outside your SAP system, keeps your core clean and talks to every release from SAP R/3 to SAP Public Cloud.

The document is produced in SAP, country rules are applied in the integration layer, and the result is written back to SAP.

SAP Public Cloud Future · fully isolated cloud architecture

SAP S/4HANA Modern · high-performance, agile

SAP R/3 Legacy · stable and secure data extraction
