Croatia

HR **Fiskalizacija 2.0 (eRačun)**

The regime

In the real-time reporting model the invoice flows between the parties and is reported to the authority at the same time.

Croatia combines the invoice itself with fiscalisation towards the tax administration.

In Croatia domestic B2B invoices have been issued as eRačun and fiscalised with the tax administration since 1 January 2026; for businesses outside VAT the duty to issue starts on 1 January 2027. TecT converts the document and writes the fiscalisation response into SAP.

The European Union's "VAT in the Digital Age" (ViDA) package cleared the way for member states to impose their own e-invoicing mandates and set a common digital reporting timeline for cross-border transactions.

What it means in day-to-day operation

- Issuing and fiscalising are one flow, not two tasks on different screens.
- The response from the tax administration belongs on the document record.
- Received documents are fiscalised as well, so inbound handling is in scope.

On the SAP side

No more native ABAP add-ons that slow the system and complicate upgrades. TecT runs outside your SAP system, keeps your core clean and talks to every release from SAP R/3 to SAP Public Cloud.

The document is produced in SAP, country rules are applied in the integration layer, and the result is written back to SAP.

SAP Public Cloud Future · fully isolated cloud architecture

SAP S/4HANA Modern · high-performance, agile

SAP R/3 Legacy · stable and secure data extraction
